IDENTIFIERS Professional Literature; *Want Ads

ABSTRACT

This bibliography, listing periodicals available at the University of California at Davis, is designed to acquaint graduating students with many trade and professional journals that consistently list job openings in various disciplines. The first section of the guide is a job title index; each entry consists of a job title, the occupational field of the job, and an accession number identifying a journal listed in the second section of the handbook. Provided in the second section are annotations for 183 journals, each of which contains the following: accession number; journal title, call number, and location within the university library system; frequency of publication; geographical coverage of job listings; and occupational fields and job titles for which advertisements are most frequently posted. HELP WANTED: JOB LISTINGS IN JOURNALS

Edited by Opritsa Popa, Irene Hoffman

and Kenneth L. Firestein

UNIVERSITY OF CALIFORNIA AT DAVIS
PETER J. SHIELDS LIBRARY
1985

TABLE OF CONTENTS

Page 3 Introduction

Page 5 Sec:1 Job title and field index

Page 23 Sec:2 Listing of journals

INTRODUCTION

Trade and professional journals are among the most current and comprehensive sources for want ads. Some are well-known and heavily used by job hunters. Many others however, carrying valuable want ads remain untapped. As a source of information, HELP WANTED: JOBLISTINGS IN JOURNALS is unique. It is a selective list of periodicals available at the University of California at Davis (UCD) Libraries which consistently include job openings in various disciplines. Our graduating students will now be able to tap all of the major job listing sources in our collection, thereby broadening their chances of finding that perfect job.

SCOPE

HELP WANTED covers approximately 200 trade and professional journals, popular magazines, newspapers and leaflets available in the collection of the University of California at Davis (UCD) Libraries.

GEOGRAPHICAL COVERAGE

The periodicals selected for inclusion offer current job opportunities in California, the United States and overseas.

ORGANIZATION of HELP WANTED:JOBLISTINGS IN JOURNALS

SECTION I: THE INDEX

The index is the logical place to begin a job search. It provides an alphabetical listing by occupational fields and job titles. Each entry consists of a job title and its occupational field. It is preceded by a unique accession number, identifying a journal listed in the second section of the bibliography. See references guide the user from alternate headings to recognized occupational titles. See also references suggest additional search terms. These headings were derived from the U.S. Department of Labor Statistics, OCCUPATIONAL OUTLOOK HANDBOOK, 1984-85, the U.S. Department of Labor, Employment and Training Administration, DICTIONARY OF OCCUPATIONAL TITLES, 1977, and the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards, STANDARD OCCUPATIONAL CLASSIFICATION MANUAL,1980. When the controlled vocabulary of the above sources was not adequate, free language terms were used.

SECTION II:JOURNAL TITLES

In this section all entries are arranged in numerical order by accession number. For each periodical title, the following information is provided: accession number, journal title, call number and location, frequency of publication (to help determine the currency of the openings listed), geographical coverage of job listings, occupational fields and job titles for which advertisements are most frequently posted.

PRODUCTION

The bibliography was produced at the University of California, Davis (UCD) Library using a DEC 11/23 mini-computer with RT-11 TSX-Plus operating system and a NEC Spinwriter printer. In the draft stage, the software used included the PDP-11 Keypad editor with formatting by Runoff. (Runoff is a formatting program distributed via DECUS and is similar to UNIX NROF). In the later stages of the project the LEX-11 WORD PROCESSING AND OFFICE AUTOMATION SYSTEM was used. RT-SORT, a sort utility which is distributed with Cobol by S & H was used in alphabetizing and numbering.

ACKNOWLEDGEMENT

HELP WANTED was compiled with the help of the UCD Library Educational Services Clearinghouse Committee. The Committee members examined over 46,000 periodical titles and selected the journals most approriate for inclusion. The editors extend their deep appreciation to all Committee members for their hard work and constructive suggestions. In addition, the editors wish to thank Eric Osborn for his many hours of dedicated work inputting, correcting and revising on the word processor.

COMMENTS and SUGGESTIONS

We would like to solicit comments and suggestions concerning the usefulness, format and coverage of HELP WANTED. Your input will contribute to the improvement of future supplements and/or editions. All suggestions will receive careful consideration. Please send your comments to : OPRITSA POPA, LIBRARIAN, HUMANITIES/SOCIAL SCIENCES DEPARTMENT, SHIELDS LIBRARY, DAVIS, CALIFORNIA 95616. Telephone: (916) 752-2030. Thank you for your help.
